

# Dark Web Monitoring

## The Must-Have Solution in Your MSP Offering

**Breach**  **Secure Now!**

Protect your clients' bottom line, reputation, and data by bringing the Dark Web to light.

### Continuous Monitoring

The increasing threat of password reuse, business email compromise scams, and ransomware attacks can be mitigated by identifying dark web data at the individual employee level – in **REAL-TIME**.

### Validated Data

InfoArmor, recently acquired by Allstate, performs dark web surveillance and monitoring of employee activity for more than **100 of the Fortune 500**.

Validated Data verified by human operatives

Affordable low-cost for you means high profit margins

Notifications optional email alerts for 24/7 protection

Effortless rollout start monitoring in minutes

### Low-Cost, High-Profit Margins

This easy add-on to your BSN Partner Subscription is a **low-cost solution** that can be easily bundled with your MSP offering. Increase your value and your margins.
